

MCKNIGHT FOUNDATION CREATES A TECHNOLOGY-ENABLED HUB FOR CHANGE MAKERS

A consistent, intuitive technology experience helps McKnight's new headquarters serve employees, grantees, and thousands of community guests.

INDUSTRY
Philanthropy

LOCATION
Minneapolis, MN

SOLUTION
Workplace Collaboration / AV Integration

- 15 Conference Rooms
- 10 Collaboration Spaces
- 1 Boardroom
- 1 Podcast Studio
- 3,000+ guests welcomed in the first year

THE CHALLENGE

When the McKnight Foundation moved into its new headquarters, it had an opportunity to leave behind the patchwork of legacy technology from its previous location. The new space needed reliable, consistent technology that would work seamlessly for employees and visiting community members, from small huddle rooms to the boardroom.

WHAT FORTÉ DELIVERED

The relationship began with a visit to FORTÉ's Experience Center, where the McKnight team could explore technology options firsthand and get a better understanding of FORTÉ's approach. From there, FORTÉ worked alongside McKnight and its architectural team early in the design process, establishing a technology standard that could scale across spaces while maintaining a familiar user experience.

“Working alongside the construction team meant we could integrate the technology into the space, rather than simply trying to fit it in later.”

Lizzy Wolterman, Account Executive, FORTÉ

THE RESULT

In the year since opening, McKnight has welcomed more than 3,000 guests who have used the technology with ease. Users can now walk into a room confident the technology will work, without worrying about technical issues causing delays or forcing a meeting to relocate.

“We can now say this is a true hybrid workplace with solid technology allowing us to do our mission-driven work.”

Anthony Lusiba,
Enterprise Technology Leader,
McKnight Foundation
