ActivPanel 10 Premium bundle

The ideal workplace solution

One-touch meetings

With DisplayNote Launcher, on the ActivPanel 10 Premium, meeting participants can instantly access room calendars and launch video calls in any Unified Communications app—Microsoft Teams, Zoom, Google Meet, Webex.

It's easy to get started with this intuitive meeting software. Simply tap app to begin, without any messy cables, input switching, or time-wasting delays.

No data left behind

With ActivPanel 10 Premium, personal logins are not required, allowing anyone to start and conduct a meeting with ease.

At the end of a meeting, leave the room confident that no footprint gets left behind. Automatic cleanup wipes all data between meetings, safeguarding privacy and ensuring confidential discussions remain secure.

Best in class audio and video

ActivPanel 10 Premium features an 8-microphone array to ensure every voice is heard. Optical bonding, QLED, and full array local dimming reduce reflection and provide every-angle views, highly accurate color, and true-black contrast for industry-leading visuals and touch performance.

To engage virtual participants, the custom-fit 4K ePTZ camera has powerful pan, tilt, and zoom functions to automatically adjust for the best view.

IT-friendly and easy to manage

The ActivPanel 10 Premium solution supports enterprise-grade security protocols, ensuring IT teams have full control over access and updates.

Designed to make it easier for IT teams to meet workplace security standards, data is stored on the OS or device, not on the panel, helping safeguard sensitive information while enabling seamless collaboration.

- USB-C and HDMI output
- Integrated soundbar with 2 x 25 W + 20 W subwoofer

- In-built 8-mic array
- Heat tempered, anti-glare, anti-fingerprint, and anti-smudge glass

ActivPanel 10 Premium bundle includes:

ActivPanel 10 Premium

ActivPanel 10 Premium helps simplify and scale teamwork across workplace environments and for all staff no matter where they're located.

Seamlessly integrating into your tech ecosystem, ActivPanel 10 Premium supports top-tier security, provides an intuitive user experience, and is built for longevity all while maintaining flexibility and affordability.

OPS-M for Windows ecosystems

Choose from a range of Windows compute devices designed to fit different budgets and system requirements—OPS-M i5, and OPS-M i7.

Benefit from Microsoft-provided operating system and security updates to keep your system secure and up to date. And when the device reaches its end of operable life, simply replace it and keep your panel in play.

All-in-one Remote

Take full control from anywhere. Easily access and edit content with the remote's track pad, full keyboard, and panel controls. Plus navigate open apps and seamlessly switch between windows whether you're at the panel or across the room.

ActivPen® 2

Your pen, your way. Quickly switch between active pen, air mouse, or digital pointer modes. Write, highlight, and manipulate content with precision and engage from anywhere in the room, making presentations dynamic and interactive.

Optional 4K ePTZ camera

Create more engaging, equitable, and hassle-free meetings for all employees, even virtual attendees. Cord-free and custom-fit, this optional camera automatically captures participants and their dialogue, with electronic pan, tilt, and zoom.

DisplayNote Launcher

Integrate Windows software solution, DisplayNote Launcher, to instantly start video calls and access apps and calendars on the panel the moment you walk into a conference room. No training is needed to get started, and at the end of a call, all content and browsing history is cleared with one touch.
