

Pre-Configured Direct View LED Displays

Choose the Right All-in-One Solution for Your Space

ViewSonic makes it easy to bring brilliant Direct View LED (dvLED) into any environment. Our pre-configured lineup gives you three clear options so you can match your space, goals, and budget with confidence.

- The **LDE Series** offers essential performance at an exceptional value.
- The **LDM Series** adds smarter features and stronger flexibility.
- The **LDP Series** delivers our most premium 4K visual experience.

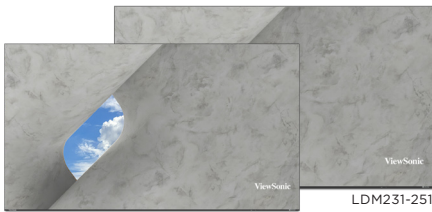

These pre-configured all-in-one solutions offer everything you need under a single part number for a seamless setup.

LDE Series

Simple. Reliable. Exceptional Value.

GOOD
Price Tier: \$

Choose this series when you need a dependable display that's simple to operate and integrates easily with the AV systems you already have. It's the right fit if you prefer to let your external devices handle the content, control, and audio.

LDM163-182

LDM231-251

What You Get:

- 136" and 163" screen sizes with 1080p resolution and 2 HDMI inputs
- 24/7-rated with durable Glue-on-Board (GOB) technology
- 3.5mm audio output for external sound systems
- Streamlined installation with all power and processing built into the cabinets

Ideal for conference rooms, lobbies, K-12 classrooms and training centers using PC inputs.

LDM Series

Smarter. More Connected. Feature-Rich.

BETTER
Price Tier: \$\$

Step up to the LDM Series when you need flexibility and smart functionality without relying on extra hardware. It's the ideal choice for teams who value built-in collaboration and easy network management. Plus, it's perfect if aesthetics are a top priority since it features a detachable control bar that you can hide for a clean, bezel-free look.

LDM136-151

LDM163-182

LDM231-251

What You Get:

- 136", 163", and 231" screen sizes with 1080p resolution and 4 HDMI inputs
- 24/7-rated with durable Glue-on-Board (GOB) technology
- Full Android OS with built-in media playback and collaboration
- PBP (Picture-by-Picture) with quad-view capability
- Wireless screen sharing via ViewSonic AirSync™ software
- Network-ready with Wi-Fi, OTA updates, and ViewSonic Manager integration
- Detachable control bar (mount up to 30' away for clean aesthetics)
- Powerful dual 30W speakers built into the control bar

Ideal for boardrooms, higher education settings, corporate lobbies, and multi-use rooms requiring flexible video layouts or network management.

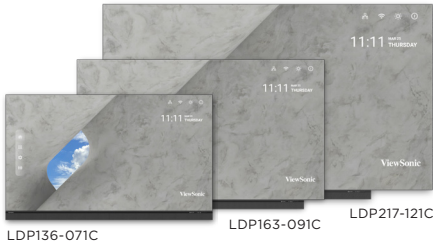

LDP Series

Premium. Immersive. Visually Stunning.

BEST
Price Tier: \$\$\$

Go with the LDP Series when only the best will do. This is the display of choice for flagship installations where image quality and brand impact are your top priorities. It represents the pinnacle of ViewSonic dvLED technology and is designed to make a statement.

What You Get:

- Everything included with the LDM Series, plus:
 - Advanced Chip-on-Board (COB) technology
 - 4K resolution for stunning visual fidelity
 - 136", 163", and 217" screen sizes
 - Higher contrast ratio and superior durability

Ideal for executive and board-level meeting rooms, corporate or hospitality lobbies serving as brand showpieces, command and control centers requiring detailed visual clarity, Higher ed performance halls and auditoriums demanding 4K performance.
